

# Create your own... Fairy Sensory Tray

## You will need:

- ★ Large plastic tray (we find that one with clear sides works best)
- ★ White and coloured rice (we made our own by mixing rice with a few drops of food colouring then leaving to dry overnight)
- ★ Glitter
- ★ Artificial flower petals
- ★ Sequins, coloured gems and iridescent ribbon cut to different lengths

## Method:

Add the white and coloured rice (we made ours pink and blue) to the plastic tray along with the glitter, sequins and coloured gems and use your hands to mix everything together. Scatter the flower petals and iridescent ribbon over the surface of the rice and your sensory tray is ready to explore. You could also add small fairy figures or plastic wands to your tray to make it even more magical.
